Gate Automation – Networking

A Better Sense of Security

CCTV

Digitron India is the complete specialist in the design and installation of Closed Circuit Television, Access Control and Integrated Security Systems. Our policy is to provide our customers with a 5-star service, ranging from technical sales and system design through to installation, training and maintenance from our in-house team.

Intruder Alarms

Since our formation in 2000, Digitron India has adhered to a simple philosophy: the belief in the need to offer excellence in customer service. This will always be an integral part of our company policy

Video & Audio Intercom

From day one, we have taken great pride in being at the forefront of the latest in digital security systems whilst maintaining competitive prices

Digitron's security systems are designed and developed to meet the individuality of every client's needs. High in quality but competitive in price, we strive to ensure that each system we install is tailored to maximize your safety and the protection of your property

Access Control System

Gate Automation Systems

We are System Integrator of CCTV, Access Control Systems, Fire Alarms and Intruder Alarms. All security systems are designed to be operator friendly with the end-user in mind. An important factor in the effectiveness of any security system is operator training. Digitron provides all manuals and training after every installation to ensure a successful security solution.

Digital Networking
& Remote Viewing

Professional CCTV Installations

CCTV

CCTV surveillance systems are now widely used. Our customers are using closed circuit systems with advanced technology, such as remote viewing, to deter crimes such as burglary break-ins and vandalism of residential and commercial property. CCTV can also be used to monitor employees and increase productivity.

Video & Audio Intercom

Digitron India provides customers with industry-leading, end-to-end video solutions and components, including cameras, lenses, domes, keyboards, DVRs/NVRs, VCRs, quads, multiplexers and more.

Access Control

We offer complete systems that fit every budget for virtually any installation, including homeland security, corrections, retail, gaming, mobile, financial and education applications. We know that a trustworthy partnership is a prerequisite to a mutually profitable business relationship

We offer complete systems that fit every budget for virtually any installation, including homeland security, industrials, retail, financial and education applications. We know that a trustworthy partnership is a prerequisite to a mutually profitable business relationship

We can help design CCTV systems for both residential and commercial installations including retail stores, commercial buildings, manufacturing plants and more using the latest Digital and IP solutions.

We can help you by installing a system that will enable you to monitor your business remotely using your existing broadband connection. No matter whether you are in the head office, at home or even travelling abroad, cameras can be directly plugged into a digital video transmission unit that can be securely viewed by you on your remote device of choice.

Intruder/Fire Alarms

Access Control

We can offer an extensive range of intruder detection and intrusion prevention products. These systems include:

- Hardwired Intruder Alarm Systems
- Wireless Intruder Alarm Systems
- Perimeter Detection Systems
- Fire Alarms

Personalised items tailored to suit your company identity, such as screen- printed bell boxes and keypads, are also available.

Intruder Alarms

Intruder Alarms

Analytical Software's

Digitron India is pioneer in Saurashtra to provide Traffic Monitoring Systems, and various analytical solution. Our state of the art products and solutions are as per global standards, features, quality and keep track on continuously changing technology.

Automated Gate Systems

Digitron provide state of the art **Automated Number Plate Recognition System (ANPR)**, real time Optical Character Recognition (OCR) based vehicle monitoring system based on automatic number plate recognition (ANPR) or License plate recognition for tracking and identification of vehicles.

Digitron provide video based **speed violation detection system** which determines the vehicular speed by calculating the time between the two frames of the vehicle and captures image of the number plate of the violating vehicle. TrafficMon speed enforcement system does not use the conventional Sensors like radars, inductive loop, lazer etc. for detecting the speed

Automated Gate Systems

Access Control

Digitron is a pioneer company in the field of Gate Automation in India. It has been involved in providing solution for range of automatic gate access systems. Digitron prides itself in offering world-class products at unmatched prices with professional after sale services.

Digitron Solution ranging from Semi-automatic to fully automatic and computerized functionality of our systems offer better security and better manpower utilization.

Intruder Alarms

Premises Security Solution

Digitron provide **Automated Under-Vehicle Scanning System (UVSS)** using high end electro-mechanicals and camera based assembly to capture static image of the complete underside of any moving vehicle.

The product enables detection of any foreign bodies in real time eg. Explosives, arms, contrabands etc. that might be hidden under the underside of a vehicle.

Automated Gate Systems

Digitron also can integrated UVSS with any other security devices like boom barriers, tyre killers, bollards, spikes, Smart Card/RFID based access control systems, etc. so as to provide a complete premise security solution.
